

```
# <Pulkit Saxena>                <09-18-2023>
# <Assignment 2>
# <Description>: In this assignment we will learn how to use the if, elif, else
function.
```

```
import random as rand
```

```
print("Lucky Calculator!")
print()
```

```
print("By: Pulkit Saxena")
print("[COM S 127 Section J]")
print()
```

```
# Determine initial player choice
print("What would you like to do?")
print()
choice = input("[c]alculator, [l]ucky number, [q]uit: ")
print()
```

```
# initial choice tasks (1 pt.)
```

```
